- + easy to create new worlds
- + easy to manipulate objects/viewpoint
- Very hard to look realistic

Computational Photography

Photography

- + instantly realistic
- + easy to aquire
- very hard to manipulate objects/viewpoint

General Comments

Prerequisites

- Linear algebra!!!
- Some computer graphics, vision, or image processing is useful, but not required.

Emphasis on programming projects!

Building something from scratch

Graduate Version:

Need to do more on each project, plus a final paper

Misc:

No laptops, no cell phones, smartphones, etc.

A Fair Warning...

Reasons not to take the class:

- Lots of work
- Need time to think, not just follow instructions
- Not worth it if you don't enjoy it
