

# Point Processing

---

15-463: Computational Photography  
Alexei Efros, CMU, Fall 2011

Some figures from Steve Seitz, and  
Gonzalez et al.

# Image Processing

---

image filtering: change **range** of image

$$g(x) = h(f(x))$$

image warping: change **domain** of image

$$g(x) = f(h(x))$$

# Image Processing

---

image filtering: change **range** of image

$$g(x) = h(f(x))$$

image warping: change **domain** of image

$$g(x) = f(h(x))$$

# Point Processing

---

The simplest kind of range transformations are these independent of position  $x,y$ :

$$g = t(f)$$

This is called point processing.

What can they do?

What's the form of  $t$ ?

**Important:** every pixel for himself – spatial information completely lost!

# Basic Point Processing

---

**FIGURE 3.3** Some basic gray-level transformation functions used for image enhancement.

# Negative

---

a b

**FIGURE 3.4**

(a) Original digital mammogram.  
(b) Negative image obtained using the negative transformation in Eq. (3.2-1).

NASA.)

# Example: Gamma Correction

a b  
c d

**FIGURE 3.7**

- (a) Linear-wedge gray-scale image.
- (b) Response of monitor to linear wedge.
- (c) Gamma-corrected wedge.
- (d) Output of monitor.

$$S = r^\gamma$$

*e.g.*  $0.25 = 0.5^{2.0}$

3.0	1.8
2.8	1.6
2.6	1.4
2.4	1.2
2.2	1.0
2.0	0.8
1.8	0.6

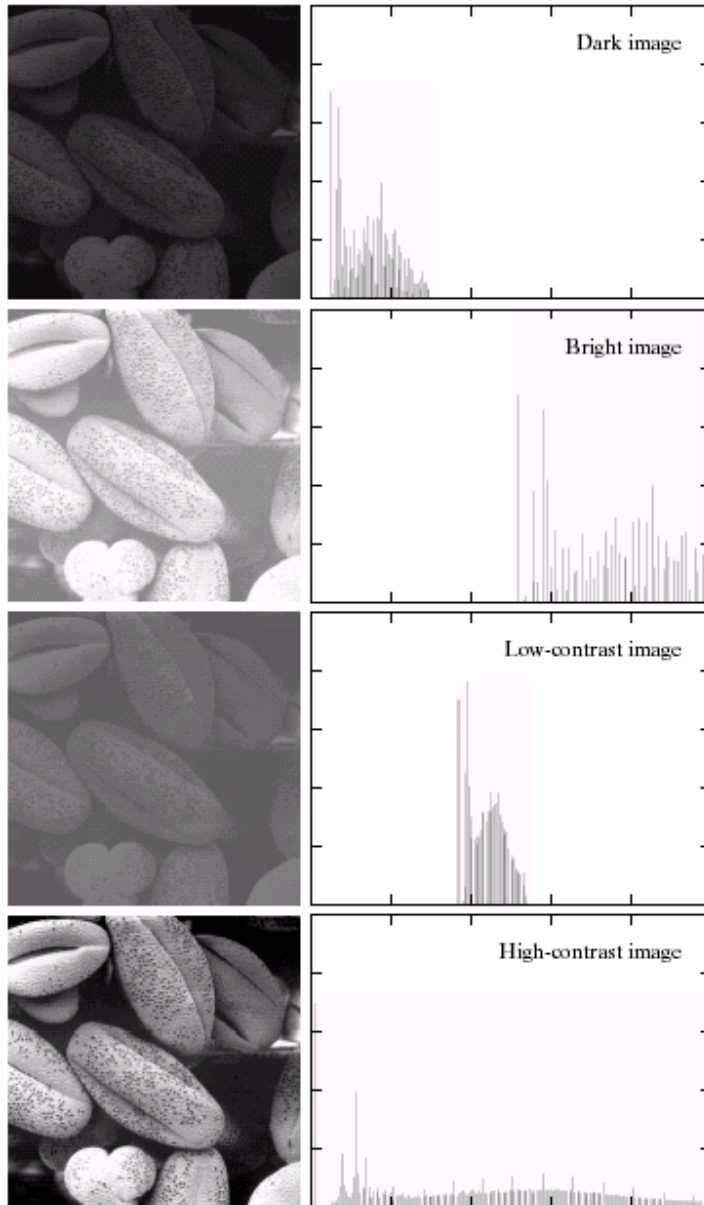

# Contrast Stretching

a b  
c d

**FIGURE 3.10**  
Contrast stretching.  
(a) Form of transformation function. (b) A low-contrast image. (c) Result of contrast stretching. (d) Result of thresholding. (Original image courtesy of Dr. Roger Heady, Research School of Biological Sciences, Australian National University, Canberra, Australia.)

# Image Histograms

Cumulative Histograms

$$s = T(r)$$

a b

**FIGURE 3.15** Four basic image types: dark, light, low contrast, high contrast, and their corresponding histograms. (Original image courtesy of Dr. Roger Heady, Research School of Biological Sciences, Australian National University, Canberra, Australia.)

# Histogram Equalization

---

**FIGURE 3.17** (a) Images from Fig. 3.15. (b) Results of histogram equalization. (c) Corresponding histograms.

# Color Transfer [Reinhard, et al, 2001]

---

Erik Reinhard, Michael Ashikhmin, Bruce Gooch, Peter Shirley, [Color Transfer between Images](#). *IEEE Computer Graphics and Applications*, 21(5), pp. 34–41. September 2001.

# Limitations of Point Processing

---

Q: What happens if I reshuffle all pixels within the image?

A: It's histogram won't change. No point processing will be affected...
