1988 Witkin and Kass (6DoF)

Witkin, Andrew, and Michael Kass. "**Spacetime constraints.**" In ACM Siggraph Computer Graphics, vol. 22, no. 4, pp. 159-168. ACM, 1988.

2003 Fang and Pollard – we can do 22 DoF sum squared accelerations without mocap

Fang, Anthony C., and Nancy S. Pollard. "**Efficient synthesis of physically valid human motion.**" In ACM Transactions on Graphics (TOG), vol. 22, no. 3, pp. 417-426. ACM, 2003.

2004 Safonova et al. – doing PCA on mocap can give us full body optimal motion

Safonova, Alla, Jessica K. Hodgins, and Nancy S. Pollard. "**Synthesizing physically realistic human motion in low-dimensional, behavior-specific spaces.**" ACM Transactions on Graphics (TOG) 23, no. 3 (2004): 514-521.

2007 Safonova – Physically based optimization through a complete motion graph, with interpolation

Safonova, Alla, and Jessica K. Hodgins. "**Construction and optimal search of interpolated motion graphs.**" In ACM Transactions on Graphics (TOG), vol. 26, no. 3, p. 106. ACM, 2007.

2007 SIMBICON – maybe controllers are not so hard after all

Yin, KangKang, Kevin Loken, and Michiel van de Panne. "**Simbicon: Simple biped locomotion control.**" In ACM Transactions on Graphics (TOG), vol. 26, no. 3, p. 105. ACM, 2007.

2009 Wang et al. – we can optimize to make controlled walks more humanlike .. used CMA

Wang, Jack M., David J. Fleet, and Aaron Hertzmann. "**Optimizing walking controllers.**" In ACM Transactions on Graphics (TOG), vol. 28, no. 5, p. 168. ACM, 2009.

2010 Year of controllers

Coros et al. – we can make generalizable controllers with no optimization (manual tuning)

Coros, Stelian, Philippe Beaudoin, and Michiel van de Panne. "**Generalized biped walking control.**" ACM Transactions on Graphics (TOG) 29, no. 4 (2010): 130.

Mordatch et al. – we can optimize controllers for uneven terrain (also used CMA)

Mordatch, Igor, Martin De Lasa, and Aaron Hertzmann. "**Robust physics-based locomotion using low-dimensional planning.**" ACM Transactions on Graphics (TOG) 29, no. 4 (2010): 71.

de Lasa et al. – we can optimize controllers based on high level features to craft goals

de Lasa, Martin, Igor Mordatch, and Aaron Hertzmann. "**Feature-based locomotion controllers.**" ACM Transactions on Graphics (TOG) 29, no. 4 (2010): 131.

Wang et al. – we can optimize for robustness (more CMA)

Wang, Jack M., David J. Fleet, and Aaron Hertzmann. "**Optimizing walking controllers for uncertain inputs and environments.**" ACM Transactions on Graphics (TOG) 29, no. 4 (2010): 73.

2012 Wang .. Muscle based controllers for nicer motion (CMA and objective similar to 2009 paper)

Wang, Jack M., Samuel R. Hamner, Scott L. Delp, and Vladlen Koltun. "**Optimizing locomotion controllers using biologically-based actuators and objectives.**" ACM Trans. Graph. 31, no. 4 (2012): 25.

2012 Mordatch et al. – Return to simple setup (no controller); key is optimize through contact changes

Mordatch, Igor, Emanuel Todorov, and Zoran Popović. "**Discovery of complex behaviors through contact-invariant optimization.**" ACM Transactions on Graphics (TOG) 31, no. 4 (2012): 43.
